# TX3000 Pro

AX3000 Dual Band Gigabit Wi-Fi 6 Router

# TX3000 Pro

## AX3000 Dual Band Gigabit Wi-Fi 6 Router

### Description

TX3000 Pro is a dual-band Gigabit Wi-Fi 6 wireless router designed for users who pursue performance experience. Both its dual-bands support Wi-Fi 6 (802.11ax) technology and the concurrent rate is up to 2976Mbps (5GHz:2402Mbps, 2.4GHz: 574Mbps). TX3000 Pro is equipped with a 12nm process dual-core 1.3GHz CPU to ensure a stable and smooth network environment; supports Wi-Fi+, which can easily solve the problem of stable Wi-Fi coverage in very large homes; equipped with built-in high-power FEMs, Wi-Fi has stronger wall penetration capabilities and longer transmission distances; it uses OFDMA+MU-MIMO technology to allow more devices to access the Internet at the same time, significantly improving transmission efficiency and significantly reducing latency.

## Main Features

---

### Dual-Core Processor , Smooth Network

The TX3000 Pro features a 1.3GHz dual-core CPU built with advanced 12nm technology. Its overall computing power is 30% higher than the older dual-core AX3000 router, resulting in lower power consumption and reduced heat generation. This powerful performance ensures a stable and smooth network experience.

### Stronger Wi-Fi Signal Throughout Your Home

The TX3000 Pro is equipped with 6 external high-gain omnidirectional antennas and built-in high-performance signal enhancement modules, significantly improving signal transmission and reception sensitivity. The 5GHz signal is faster and more stable, easily enabling high-speed Wi-Fi 6 coverage throughout medium to large apartments.

### Smooth Internet Experience with AX3000

The TX3000 Pro offers a dual-band concurrent rate of up to 2976Mbps, with 2402Mbps on the 5GHz band and 574Mbps on the 2.4GHz band. It supports an ultra-wide 160MHz bandwidth, compatible with mobile phones that support the same bandwidth. This enables the signal to travel more freely over a wider channel, maximizing device performance and enhancing your internet experience.

### Ultra-Wide Coverage with Wi-Fi+

With the Wi-Fi+ function, multiple TX3000 Pro units can be easily networked without any configuration, providing a high-speed whole-home Wi-Fi experience for larger homes.

# Technical Specifications
